in designing, and all things."

CORE VALUES

Coding, writing and designing shouldn't be confusing and overly complex. I work hard to make things as simple as it can be, so that anyone can understand the work that I do.

VISUAL LAYOUT

My layout is consistent, uniform and predictable. All content is divided into horizontal sections by topic in logical organization.

in designing, in all things."

LOOK AND FEEL

simple clean elegant

COLORS

A mix of neutral and warmer toned colors are used to create contrast between elements. Whites, gray and neutral dark browns form the background and body text, while lighter and darker oranges are used to highlight buttons and visual assets.

#FFFFFF

#F2F1F2

#F1E2D8

TYPOGRAPHY

Script, serif and sans serif fonts differentiate between types of texts. Script fonts are used for decorative purposes; serif fonts are used for headings; and sans serif fonts are used for body text.
